Technical Datasheet - Removable Labels

Polypropylene - Gloss White Removable

Label material:
A bi-axially oriented, gloss polypropylene film
Thickness: 59 micron ±5%
Basic weight: 58 gsm ±5%

Adhesive:
A dispersion based removable, acrylic adhesive
Initial Tack: low
Final Adhesion: low
Minimum Application Temperature: +2°C
Temperature Range: -40°C to +100°C
UV Resistance: excellent

Release liner:
A supercalendered siliconised white glassine paper, with high mechanical resistance to tearing.
Thickness: 57 micron ±5%
Basic Weight: 65 gsm ±5%

Direct application to food:
The adhesive complies with the European food directives and legislations, FDA 175.105 and with BgVV XIV recommendations for direct contact with dry and moist, non fatty foodstuffs.

Disclaimer: Product performance should always be tested in the actual application conditions. We cannot assume any liability for damage caused through the use of our products as they are used in conditions beyond our control.
